16 - 18 °C

CURIOSITY

Cabernet Sauvignon is certainly the most versatile variety in the world for the production of high quality and long lasting wines.

It has great ability to adapt to the most diverse climatic conditions and winemaking techniques, while retaining its recognizable characteristics while perfectly expressing the various *terroir*.

It seems to be the fruit of a spontaneous crossing of cabernet franc and sauvignon blanc, occurred somewhere in Gironde in the eighteenth century.

PACKING DETAILS
