CURIOSITY

There are two schools of thought on the origin of the name Negroamaro: the first is that it would be a reference to the dark color of the variety and its strong and decisive flavor (although we must not take the letter "amaro" (bitter) given that it is a vine from southern Italy, an area known for the production of mature red wines with high sugar levels).

The second school of thought uses a Latin-Greek interpretation and says it means "dark black" (from the Latin *niger* (black) and the Greek *mavros* (dark)), a reference to the intense color of this wine.
