CURIOSITY

Those who consolidated the tradition of lambrusco production were the Benedictine monks of the abbey of Polirone at San Benedetto Po. The monks encouraged the cultivation of vine and the production of wine, according to the techniques they refined, creating, in fact, the product we still know. The testimonies found at the Abbey of San Benedetto Po also show how the art of winemaking was important not only as a dominant activity of a particular period of the year, but also for its religious significance and its liturgical implications, so much to be included in monumental and decorative works.
